In this project I have used data from Twitter account that interesting in rating dogs. (@dog_rates)

Analysis:

1- Division of the dog stages:

In general number of Likes are very higher than number of Retweets overtime (trends). So, we can say that, the people prefer like/favorite over retweet

2- Which dog breeds are most popular? (likes and retweets)

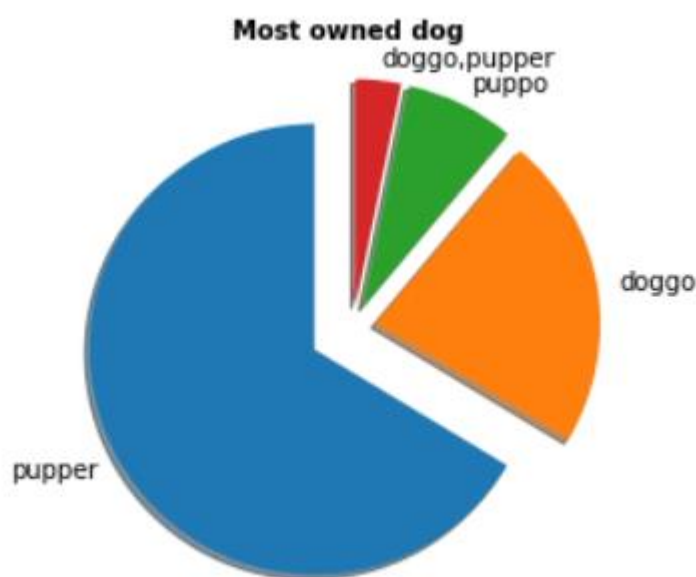

The dog breeds that have most likes is not similar to the dog breeds that have most retweets. There are some dog breeds appear in the two visuals: bedlington terrier. Dog breeds that have highest number of retweets are samoyed and cocker spaniel.

In general, number of likes or favorites is much higher than the number of retweets.

3- Which is the most owned dog? with average rating

Pupper is the most owned dog and at the same time it has the lowest average ratings.
